

Flexible Bait station **FBS01**

FBS, the flexible (foldable) and compact bait station

Rodent bait stations are an essential tool for professionals to control rodents.

They offer a safe location, where rodents are lured into and effectively controlled.

Flexible Bait station FBS01

The professional rodent bait-station, which offers compactness and flexibility

Rodent bait stations are an essential tool for professionals to control rodents. They offer a safe location, where rodents are lured into and effectively controlled.

Compact design

The foldable bait station is designed to reduce space. In folded position the FBS needs an absolute minimum on space requirements. This reduces transport costs and warehousing & transportation space.

Multifunctional

Once unfolded and set up, the FBS can be used to control rodents, both indoor and outdoor in three different ways:

- **Snappers**

The FBS can hold 2 snappers. The bottom of the FBS holds fixation clips this to ensure that these snappers are securely tightened in its slot position.

- **Glue board**

The FBS can hold a glue board. Rodents are very suspicious and will not easily enter new areas. Before they do so they will want to inspect these areas, whilst being on their guard. The two entrances

and glue board are designed in such a way they can easily investigate and inspect the inner area, whilst keeping their 4 legs on hard ground. The glue board is secured in its position by means of 4 holders, which are integrated in the bottom plate of the FBS

- **Rodenticides**

Two rodent blocks can be installed on the metal frame, which ensure that these blocks stay inside the FBS. This metal frame is secured to stay in its position, by means of fixation points in both the bottom and the lid part of the FBS

Safe & optimized positioning

Two locks ensure that the FBS is secure from unwanted hands. As the top lid opens sideways, the FBS can be installed directly onto the wall, which is essential for optimized positioning of any bait station.

Technical specifications

Name	:	Rodent bait station FBS01
Material	:	high grade polypropylene
Dimensions	:	235 x 82 x 163 mm
Weight	:	380 gr (excl. inner mounting parts)
Color	:	Black
Use	:	Indoor and outdoor
Lock	:	Double anti tamper proof lock mechanism
Key	:	included in the scope of supply
Opening	:	Top lid opens sideways
Drainage	:	Included in the design.
Mounting	:	4 holes included in the bottom
Pallet volume	:	1200 pcs
